

Bovine Type II Collagen

Proskin[®]

Extra Support of Joints & Bones

Anti-Inflammatory Effect

Decreases arthritis pain

Supports joints and bones health

Inhibition of rheumatoid inflammatory factors and TNF - α

E-Code: 82956

Extra Support of Joints & Bones

According to clinical studies in recent years, bovine collagen (collagen Peptide) have the effects of mitigating joint symptoms and relieving arthralgia.

Some evidence suggests that one of the candidate autoantigens is bovine type II collagen. As bovine type II collagen mixtures produced by hydrolyzing collagen orally administered supplements with latent beneficial efficacy for improving bone joint symptoms and bone tissue regeneration.

One of the candidate autoantigens is type II collagen, which represents about 85-90% of the collagen in articular cartilage.

Supplement Facts

Serving Size: 2 Capsules
Servings Per Container: 30

	Amount Per Serving	%Daily Value
Collagen Peptides (Bovine Gelatin Hydrolysate)	1000 mg	*

*Daily Value not established
